

Thobani Antony Zondi

Microsoft Azure Engineer | Cloud Engineer | DevOps Engineer

Johannesburg, Gauteng | 078 165 2684 | thobanizondi69@gmail.com

LinkedIn: [linkedin.com/in/thobani-zondi](https://www.linkedin.com/in/thobani-zondi) | GitHub: github.com/thobanizondi

Professional Summary

Microsoft-certified Cloud Engineer with experience supporting Azure cloud environments, cloud infrastructure, automation, identity management, and enterprise applications. Certified in AZ-104, AZ-305, SC-900, and DP-300, with hands-on experience in Azure SQL, Azure Data Factory, Azure DevOps, Docker, CI/CD, Git, and cloud operations. Strong background in technical support, troubleshooting, monitoring, and delivering secure, scalable cloud solutions.

Technical Skills

- **Microsoft Azure:** Azure Administration, Azure SQL, Azure Data Factory, Azure DevOps, Azure Storage, Azure Networking, Azure Security, Azure Monitor
- **Identity & Security:** Microsoft Entra ID (Azure AD), IAM, RBAC, MFA, SSO, Security & Compliance
- **Automation & DevOps:** PowerShell, Git, GitHub, GitHub Actions, CI/CD, Docker
- **Databases:** Azure SQL, SQL Server, Oracle, MySQL, Snowflake
- **Programming:** Python, SQL

Certifications

- **AZ-104:** Microsoft Azure Administrator
- **AZ-305:** Designing Microsoft Azure Infrastructure Solutions
- **SC-900:** Security, Compliance & Identity Fundamentals
- **DP-300:** Administering Microsoft Azure SQL Solutions
- AZ-900, AI-900, PL-900, PL-300
- **Other:** MuleSoft Developer I, MB-910, MB-920, Docker Fundamentals, CompTIA A+

Education

Explore AI Academy, *May 2025 - May 2026*

- Higher Certificate in Data Science (In Progress)

Digital Regenesys, *Jun 2025 - Jan 2026*

- Certificate in Foundation Data Science and Business Analytics
- **Key focus:** Predictive Analytics, KPI Dashboards, ML, MIS, Visualization

Rosebank International South Africa (formerly IIE Rosebank College), *Feb 2025 - Dec 2025*

- Advanced Diploma in Application Development

Rosebank International South Africa (formerly IIE Rosebank College), *Feb 2017 - Dec 2019*

- Diploma in Information Technology (Software Development)

Professional Experience

SQL Database Developer | Penrose Systems

Sept 2025 - Present

- Administer and optimize SQL Server and Azure SQL environments.
- Monitor performance, troubleshoot issues, and support production systems.
- Develop ETL processes and automation scripts.
- Ensure database security, availability, and reliability.

Junior Salesforce Developer / CRM Analytics | Bizmod Consulting

Apr 2024 - Sept 2025

- Supported cloud-based business applications and integrations.
- Developed APIs, automation solutions, and technical documentation.
- Administered enterprise systems and user access controls.

Service Desk Analyst | Waymark Infotech

Jun 2023 - Mar 2024

- Supported enterprise infrastructure and identity management processes.
- Resolved incidents, monitored systems, and maintained service availability.
- Assisted with user access management and security administration.

Personal Projects

AWS-dbt-Snowflake-End-to-End Data Pipeline

Python, AWS S3, Snowflake, dbt, GitHub

- Built a full Medallion Architecture pipeline (Bronze - Silver - Gold) ingesting Airbnb style rental data from AWS S3 into Snowflake using dbt for transformation.
- Implemented incremental loading with Created at Watermarking, SCD Type 2 snapshots for historical tracking, and custom Jinja macros for precision arithmetic.
- Added automated data quality tests and deployed 11 models across bronze, silver and gold layers with 5,000 records processed end-to-end.
- GitHub: <https://github.com/thobanizondi/aws-dbt-snowflake-end-to-end-pipeline>

Insurance Analytics Pipeline

Python, SQL Server, Stored Procedures, dbt, Prefect, Power BI

- Built a full ETL pipeline on 10,000 rows of SA insurance data using SQL Server stored procedures for staging and dbt for Star Schema modeling across 4 dimensions and 1 fact table.
- Implemented fraud detection logic, 3 dbt data quality tests enforcing business rules and custom risk categorization macro.
- Delivered a 3-page Power BI dashboard covering Claims Overview, Fraud Analysis and Customer insights, orchestrated daily with Prefect.
- GitHub: https://github.com/thobanizondi/insurance_analytics_pipeline

Banking Risk Analytics Pipeline

Python, SQL Server, Apache NiFi, Scikit-learn, Pandas, Matplotlib

- Built an end-to-end banking risk monitoring pipeline processing transaction data with 7 automated data quality checks before loading.

- Trained ML models to classify HIGH and LOW risk transactions and create SQL analytical views for branch-level risk reporting.
- Integrated Apache NiFi REST APIs for live pipeline monitoring and built visual dashboards using Pandas and Matplotlib for trend analysis.
- GitHub: <https://github.com/thobanizondi/bank-etl-nifi-pipeline>

Key Strengths

- Azure Administration & Cloud Operations
- Microsoft Security & Identity Management
- Cloud Infrastructure & Automation
- Technical Troubleshooting & Support
- CI/CD & DevOps Practices
- Client Support & Stakeholder Communication
- Documentation & Knowledge Transfer
