Professional Summary

Cloud and Data Engineering professional with experience supporting cloud-based solutions across AWS and Microsoft Azure environments. Skilled in Docker, CI/CD, SQL, Python, API integrations, cloud-native data platforms, and automation. Strong foundation in DevOps practices, cloud infrastructure, database administration, and production support. Passionate about building scalable, secure, and reliable cloud solutions.

Technical Skills

- **Cloud:** AWS (S3, IAM, EC2 Fundamentals), Microsoft Azure, Azure Data Factory, Azure SQL, Azure DevOps, Oracle Cloud Infrastructure
- **Containers & DevOps:** Docker, Kubernetes (Learning), Git, GitHub, CI/CD, GitHub Actions
- **Databases:** Snowflake, SQL Server, Oracle, Azure SQL, MySQL
- **Programming:** Python, SQL, dbt
- **Integration & Automation:** REST APIs, MuleSoft, Swagger, ETL Pipelines
- **Monitoring & Support:** Incident Management, Root Cause Analysis, Production Support

Education

Higher Certificate in Data Science (In Progress)

- Explore AI Academy, May 2025 - May 2026

Certificate in Foundation Data Science and Business Analytics

- Digital Regenesys, Jun 2025 - Jan 2026
- **Key focus:** Predictive Analytics, KPI Dashboards, ML, MIS, Visualization

Advanced Diploma in Application Development

- IIE Rosebank College, Feb 2025 - Dec 2025

Diploma in Information Technology (Software Development)

- IIE Rosebank College, Feb 2017 - Dec 2019

Certifications

- **Microsoft:** PL-900, PL-300, DP-300, AZ-104, AZ-305, SC-900, AZ-900, AI-900
- **Oracle:** Cloud Infrastructure (Generative AI), Cloud Data Management
- **Salesforce:** Administrator, Developer I, App Builder, Sales Cloud
- **ISTQB:** CTFL, Agile Tester Extension
- **Other:** MuleSoft Developer I, MB-910, MB-920, Docker Fundamentals, CompTIA A+

SQL Database Developer

Penrose Systems - Johannesburg, South Africa (*Sept 2025 - Present*)

- Refactored legacy SQL stored procedures and query logic, reducing report execution time by 40% and stabilizing production reporting workloads.
- Developed rollback-safe ETL scripts and data integration pipelines, ensuring reliable and audit-ready datasets for compliance and analytics teams.
- Consolidated fragmented data sources into structured analytics-ready datasets, improving data accessibility for reporting teams.
- Proactively monitored database performance, identifying bottlenecks, and preventing potential production downtime.

Junior Salesforce Developer / CRM Analytics

Bizmod Consulting - Johannesburg, Gauteng (*Apr 2024 - Sept 2025*)

- Integrated Salesforce CRM with Einstein Analytics, delivering real-time dashboards that increased data-driven decision making by 20%.
- Built scalable ETL workflows connecting CRM and BI platforms, improving data synchronization and reporting accuracy.
- Applied Einstein Discovery predictive models to analyze sales performance, contributing to 15% revenue growth.
- Produced API integration documentation, sequence diagrams, and Swagger specifications to support system integration.
- Administered and optimized Salesforce environments across Sales Cloud, Service Cloud, and CRM Analytics, supporting 20+ users and ensuring reliable system performance and data accessibility.

Service Desk Analyst

Waymark Infotech - Centurion, Gauteng (*Jun 2023 - Mar 2024*)

- Supported execution of high-volume batch processes, diagnosing failures, and restoring services to maintain uninterrupted data pipelines.
- Resolved system incidents and service requests while maintaining 90% first call resolution rate.
- Monitored production alerts and logs to identify anomalies and prevent system downtime.
- Assisted with Oracle Identity Management operations, maintaining secure access control and system availability.

Salesforce Developer Intern

Waymark Infotech - Centurion, Gauteng (*Jan 2023 - Jun 2023*)

- Built customized Salesforce dashboards and reports for 10+ business users, improving operational visibility and enable faster decision-making.
- Developed automated workflows and UI enhancements, reducing manual CRM tasks by 30% and increasing user adoption across the sales team.
- Participated in Agile development cycles, contributing to sprint planning, backlog refinement, testing, and feature delivery within scheduled release timelines.
- Performed data migration of 5,000+ CRM records using Data Loader, validating data accuracy, and maintain data integrity during imports and exports.

Personal Projects

AWS-dbt-Snowflake-End-to-End Data Pipeline

Python, AWS S3, Snowflake, dbt, GitHub

- Built a full Medallion Architecture pipeline (Bronze - Silver - Gold) ingesting Airbnb style rental data from AWS S3 into Snowflake using dbt for transformation.
- Implemented incremental loading with Created at Watermarking, SCD Type 2 snapshots for historical tracking, and custom Jinja macros for precision arithmetic.
- Added automated data quality tests and deployed 11 models across bronze, silver and gold layers with 5,000 records processed end-to-end.
- GitHub: <https://github.com/thobanizondi/aws-dbt-snowflake-end-to-end-pipeline>

Insurance Analytics Pipeline

Python, SQL Server, Stored Procedures, dbt, Prefect, Power BI

- Built a full ETL pipeline on 10,000 rows of SA insurance data using SQL Server stored procedures for staging and dbt for Star Schema modeling across 4 dimensions and 1 fact table.
- Implemented fraud detection logic, 3 dbt data quality tests enforcing business rules and custom risk categorization macro.
- Delivered a 3-page Power BI dashboard covering Claims Overview, Fraud Analysis and Customer insights, orchestrated daily with Prefect.
- GitHub: https://github.com/thobanizondi/insurance_analytics_pipeline

Banking Risk Analytics Pipeline

Python, SQL Server, Apache NiFi, Scikit-learn, Pandas, Matplotlib

- Built an end-to-end banking risk monitoring pipeline processing transaction data with 7 automated data quality checks before loading.
- Trained ML models to classify HIGH and LOW risk transactions and create SQL analytical views for branch-level risk reporting.
- Integrated Apache NiFi REST APIs for live pipeline monitoring and built visual dashboards using Pandas and Matplotlib for trend analysis.
- GitHub: <https://github.com/thobanizondi/bank-etl-nifi-pipeline>

Strengths & Competencies

- AI & Data Analytics
- SQL & Data Engineering
- Risk Analytics & Compliance Reporting
- Data Quality & Governance
- Stakeholder Communication
- Agile Collaboration
- Problem Solving & Continuous Learning
